Our local Walmart is selling the Joytech 16 MB GameCube Memory Card \$9.98 in-store. Doing a price search shows this is a very good price. We recommended getting the Animal Crossing "Players Choice" version a few weeks back because it came with a memory card. The Animal Crossing memory card is only 4 MB and one Animal Crossing save will use all of the remaining space on the card. So, in order to save or progress in Donkey Kong Jungle Beat and other GameCube games we suggest picking up one of the Joytech cards from Walmart.
